

New Firmware Update Available for Stages Indoor Cycling Power Meters (971-0101 Model) - v1.5.0

Products Affected:
971-0101 Stages Indoor Cycling Power Meters ("Gen 3")

Updates include:

Improvements to automatic zero reset processing
Cadence filtering improved
Bug fixes

Prior versions of firmware have included: v1.2.0, v1.1.9, v1.1.8, v1.1.1

How do I know if my power meter needs to be updated?

We suggest all facilities with 971-0101 (Gen 3/SPM-2) power meters update their power meters, as this update contains significant improvements and bug fixes.

You can look at the model labeling on the back of the power meter (near the battery cover). This update affects those labeled "SPM-2" - those labeled "SPM1" do not require an update.

How do I update the power meter firmware?

Step-by-step guides for power meter firmware updates can be found within our Knowledge Base and via YouTube:
