## GATEWAY

### Bug Fixes

- Fixed an issue where space events took a long time to load or would not load at all.
- Spaces should no longer turn off when receiving vacancy events from motion sensors unless all motion sensors are reporting as vacant within the space.
- Fixed an issue with dashboard events failing to load correctly.
- Fixed an issue that prevented users from being able to enter in zero for occupancy timeout in policies.
- Fixed an error that was causing the Runtime service to crash on startup.
- Fixed a null reference exception when a space timer was null.
