GATEWAY

General

- Added a test “play” button to spaces list. Now users can simply click the play button next to a space name to “wink” the lights and relays in the space, similar to how the devices list works.
- Added a test “play” button to relays in the devices list.
- After licensing, the admin application will now redirect to the dashboard instead of the Space Groups page.
- A new setting is now available to configure the light level during commissioning.
- Added a new display option on the devices list to show network switch name and port.

Bug Fixes

- Fixed an issue with the IP address not displaying correctly on the node detail page.
- Fixed an issue with multi-select dropdowns that would leave user input in the input box after selecting an item from the list.
