### Spam, phishing, and malware

**Email whitelist**  
Locally applied

An email whitelist is a list of IP addresses from which you want your users to receive emails. Mail sent from these IP addresses should not be marked as spam. In order to take full advantage of Gmail's spam filtering service and for best spam classification results, IP addresses of your mail servers that are forwarding email to Gmail should be added to Inbound Gateway and not in IP Whitelist. ?

Enter the IP addresses for your email whitelist:  
172.217.25.142

Separate entries with commas

**Enhanced pre-delivery message scanning**  
Locally applied

Enables improved detection of suspicious content prior to delivery. ?  
**This may delay the delivery of certain messages.**

Consequences: Reject message

**Content compliance**  
Disabled  
Locally applied

Email block

Messages: Outbound  
Matches: 1  
Consequences: Reject message

EDIT ENABLE DELETE **ADD ANOTHER** COI

**Comprehensive mail**  Ensure that a copy of all sent and received mail is stored in associated users' mailboxes. ?

## Add setting

### Content compliance

[Help](#)

Block Email from ncovid2019.gov.in

#### 1. Email messages to affect

- Inbound
- Outbound
- Internal - sending
- Internal - receiving

#### 2. Add expressions that describe the content you want to search for in each message

#### 2. Add expressions that describe the content you want to search for in each message

If ANY of the following match the message ▾

Expressions	ADD
Simple content match ▾	
<b>Content</b> <u>ngov2019.gov.in</u>	
<b>CANCEL</b> <b>SAVE</b>	

3. If the above expressions match, do the following

Reject message 

Customize rejection notice Optional

Enter customized rejection notice. (e.g. "Your email has been rejected because it violates organization policy").
