How the allowances work

This plan has 5 allowances that work concurrently. These are:

- Talk to Anyone
- Talk to Live Connected Mobiles
- Included Text

- Included Data
- Unlimited Social Networking

Because the allowances work concurrently, unlike some other plans you don't need to use up all of your allowance on one category before you get the other.

So for example:

- If you call or text a non-Live Connected number your calls come out of the Talk & Text to Anyone category's allowance
- If you call a Live Connected mobile within Australia your calls come out of the Talk to Live Connected category's allowance

This allows you to get best use of your bonus Live Connected to Live Connected credit.

Some important things to remember:

- If you exceed the usage on one of the category's allowances, the excess cannot be put into another category. For example if you exceed your Talk to Live Connected mobiles category allowance, the excess will be charged on top of your plan access fee.
- If you exceed the included value in any one billing period the standard rates of your plan will apply.
