WebCAPE/CEFR Equivalencies

The following equivalencies between WebCAPE scores and levels defined by the Common European Framework (CEFR) of language proficiency were calculated using a substantial data set from Brigham Young University's English Language Center. BYU's ELC has used WebCAPE products since their creation to assess English language learners' ability in English.

These equivalencies are provided as one reference point in determining an individual's language proficiency but additional considerations may be required depending on how test results will be used and the background of test takers.
