

Resistograph Not Connected to This System

Platform

Generic Collect

Summary

The screenshot displays the 'RESISTOGRAPH PD SERIES INTERFACE' software. At the top, there are fields for 'Pole7421', 'PoleOwner City of Hamilton', and 'Inventory Status'. To the right, there are radio button options for 'Bad', 'Margir', and 'Good', with 'Good' selected. A prominent orange banner with a red 'X' icon and the text 'Resistograph Measurements' is visible. Below this, the interface is divided into two main sections. The left section contains input fields for 'Height-Class', 'Circumference (in inches)' (value: 32), 'Diameter (in inches)' (value: 10.19), and 'Drilling Depth' (value: 10.19 inches, 25.87 cm). Below these fields are two buttons: '1. Prepare for Drilling' and '2. Read Measurements'. The right section is a numeric keypad for 'Circumference' with buttons for digits 0-9, a decimal point, and a left arrow. At the bottom of the interface, a red error message reads 'Resistograph not connected to this system'. At the very bottom, there are 'OK' and 'Cancel' buttons.

Description

The above error can occur when the resistograph is not connected to the Toughbook via Bluetooth.

Troubleshooting

1. Reboot the Toughbook and try to connect again
2. If that does not work, contact Alden Support
