

Congratulations! You just got **flowleash plus** with adjustable flowcord, a pair of floop handles and truly solid stainless steel swivels for the smoothest orbitals available to mankind. This guide will provide you with instructions on how to install them onto various flowtoys props. If you need more instructions, please feel free to contact us at support@flowtoys.com

ATTACHING FLOWLEASH TO CAPSULE LIGHTS *(for podpoi and capsule poi)*

- Pull the silicone o-ring off the end of the capsule (leash side, not button side).
- If installing in podpoi, thread the end of your flowleash through the tri-ring.
- If installing in capsule poi, thread the end of the leash through the modified crystal case.
- Thread the end of your flowleash through the silicone o-ring, then place the knot and washer inside the capsule shell.
- Close the capsule and reinstall the o-ring. Voila!

ATTACHING FLOWLEASH TO CRYSTAL CASES

- Thread flowcord through metal o-ring provided, then through your crystal case. O-ring should be on handle side of leash.
- Thread the non-handle end of flowcord through the ring as shown.
- Adjust leash length as needed.
- Tie a simple overhand knot on the non-handle end to secure the leash.

FINISHING LEASH ENDS

- Tighten the knot. Cut excess cord off with scissors.
- Melt the end of the knot with a lighter. While the end is still soft/melted, use the edge of the lighter to flatten and shape the end of the knot onto the rest of the knot. This ensures the knot will not come undone.

Tip: If the melted plastic sticks to the lighter, it's too hot. Wait a second before shaping it.

LIFETIME WARRANTY

Flowtoys are designed to last you a lifetime, but nothing is indestructible, so we provide this warranty to enable you to freely find your flow*. We offer free replacements on defective or non-working parts due to normal use, and 50% credit for products in any condition at any time. If the tips in this guide do not keep your flowtoys working for years to come, please contact us at support@flowtoys.com.

* Flowtoys reserves the right to refuse coverage to anyone abusing this warranty. Please contact us before sending in your product, or it may be returned to sender.

CORD CONNECTOR W/ FLOWLEASH

INSTALLING FLOWCORD ONTO CORD CONNECTORS

- Melt the end of the flowcord (to prevent fraying). Push and twist the cord to help thread it through the connector.
- Slide a washer onto the end of the flowcord (you can use pliers to help pull it through).
- Tie a simple overhand knot below the washer – don't tighten it yet! Check and confirm how long you'd like your leashes to be.
- Once you find your ideal length, tighten the knot, and trim off excess cord with a pair of scissors, leaving 1/8" or 3mm extra to melt.
- Using a small flame, melt the end of the cord until it reaches the surface of the knot and use a flat metal surface to press the melted end into the sides of the knot, fusing it together and ensuring it cannot come undone! (the side of a lighter works great :)
- Snug the washer up against the knot. Install cord connectors per instructions that came w/ your cord connector rigs.

Note: Flowcord needs a washer to secure leash to connector. Phatty cord does not require washer.

ADJUSTING THE LENGTH OF YOUR POI LEASH

Adjusting your leash to fit your body and style is an easy and important step to optimizing your poi experience.

- If podpoi or capsule poi, pull excess cord through o-ring near handle to get to your desired leash length
- If crystal poi, pull excess cord through o-ring near crystal case to get to your desired leash length
- Mark the point where the excess cord meets the small ring (any pen should do)
- Pull back some slack on the excess side of the cord, cut at the mark
- Melt the end with a lighter until it makes a substantial disk of melted cord-tip. You can also tie a knot and melt to seal it for extra security.

Tip: Practice on the extra cord first!

- Let cool, pull the cord tight and enjoy!

Don't ask yourself what the world needs.
Ask yourself what makes you come alive, and then go and do that.
Because what the world needs is people who have come alive. - Howard Thurman

DO GOOD. BE AWESOME. MAY THE FLOW BE WITH YOU!
