

HSE Conformance Test Kit

FOUNDATION Fieldbus HSE Stack Testing

Description

The HSE Conformance Test Kit is a complete package that allows the user to ensure a manufacturer's stack conforms to the foundation's official HSE registration testing. This product will verify the correct communication behavior of an HSE device as defined in the HSE specifications. It is an excellent tool for troubleshooting and debugging HSE devices.

Features

- Ensures stack conformance prior to HSE interoperability testing

System Requirements

- Computer running Windows XP
- Network Interface Card (NIC)
- Available parallel or USB port

General Hardware Requirements

- Power Supply
- Power Conditioner
- Terminators (2)
- Ethernet Switch
