

Registered Device Description (DD) Library

FOUNDATION Fieldbus DD Library

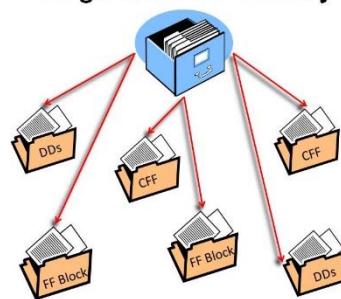

Description

The DD Library contains DD source code that device developers can import and use to build the device description. The source code for all standard FOUNDATION™ fieldbus parameters and blocks is included, in addition to the archives of all registered CFFs and DD files. Manufacturers only need to implement custom block and other manufacturer-specific additional parameters.

FOUNDATION

Registered DD Library

Features

- A necessary feature in aiding in the development of device description files for FOUNDATION fieldbus devices
- Continuously updated archive of all FOUNDATION fieldbus Registered Device Support Files (DD/CFF)

System Requirements

- Source code is platform independent
- DD Services enabled host system software required to use Registered Device Support Files

Kit Components

Qty	Item	Rev. No.
