# HART Smart Device Configurator 625 Source Code Partner Program

Description

The HART Smart Device Configurator 625 (SDC-625) Source Code Partner Program provides a royalty-free license to the source code for developers. This enables cost-effective development of HART EDD-enabled Host Applications. The source code library provides several convenient functions to make it easier for a system supplier to develop DD-based applications.

Features

- SDC-625 integration in your host application ensures continued support for the existing installed base of Device Descriptions while enabling support of the new language extensions in future devices
- SDC-625 can be used with multiple host operating system platforms
- 16 hours of engineering support, limited to the project setup and technical support questions about SDC-625

System Requirements

- Pentium-class PC
- Windows XP/7
- Visual Studio IDE

Kit Components

Qty	Item	Rev. No.
1	HART Smart Device Configurator Source Code	4.2.0
