SPARK 7.6 | AUGUST 2021

Release Notes Summary

WHAT'S NEW

We've spent countless hours interviewing our users on ways to improve their SPARK experience, and with the release of SPARK 7.6, we'll be introducing a new homepage experience designed to simplify your workflow and surface the most relevant details.

For managers, we've made it easier than ever to create and manage your team in SPARK. Create your team, change the roles you want to see, and even filter for team members with assigned packages.

We've also updated the overall look and feel of SPARK with more modern, accessible colors and components. We were careful in our re-design to make sure SPARK will still feel familiar to you.

WHAT'S CHANGED

Sub Accounts in Financial Analysis – We introduced search-as-you-type functionality in order to shorten the sub accounts list.

Guarantor Analysis – We will now show guarantors, applicants, and owners (20% or more) in the Guarantor Analysis and the corresponding credit memo section.

Decision Requests – We've now changed it so that any user who "Can Create or Complete Decision Requests" can complete any decision request.

We've also introduced new permissions and changes to the scorecard – you can find in the full release notes.

DASHBOARD HIGHLIGHTS

- Each user has access to a Personal Dashboard
- Managers and Executives will have access to more enhanced dashboards
- Package assignments are now aggregated into our new To-Do's panel on your dashboard
- You and your team can now upload profile images as you work together in SPARK

WHAT'S BEEN FIXED

- Duplicate periods and invalid addresses in Document Analysis
- Total exposure page fails when the lease terms weren't defined
- Incorrect time zone when changing 2-factor authentication
- Mismatched placeholders when certain documents were sent to DocuSign
