

# Adding pCloudy Devices to Your Apple Developer Account

Before installing the test ipa on any of the iOS device on pCloudy platform please add the test devices to your Apple Developer Account by following below steps:

1. Login to <https://developer.apple.com/>
2. Go to the "Member Center."
3. Go to "Certificates, Identifiers & Profiles."
4. Choose "Devices" on the left navigation.
5. Click on the "+" sign to add a device.
6. Enter a name for the device, and the UDID.
7. At the bottom of the page choose continue when you are done.
8. At the bottom of the page choose "Register" to register the new device. Repeat these steps to add up to 100 devices on a regular account.

## How to find the UDID of iOS device from pCloudy platform

1. Login to <https://www.pcloudy.com/>
2. On the devices tab all the devices are listed. Please click on the "CONNECT" button on the required device. (Refer below screen shot)
