

Gardener's Gold™ Premium Compost

The best way to treat your soil!

- ✓ Improves soil structure
- ✓ Improves aeration
- ✓ Increases water absorption
- ✓ Reduces nutrient run-off
- ✓ Reduces wind erosion

Recycled yard trimmings increase plant growth!

As a soil amendment, Gardener's Gold™ Premium Compost contains the same properties as a slow release fertilizer; therefore, it improves plant growth. The compost material improves the soil's chemical and biological properties as it creates a pH buffer and increases the soil's ability to hold water and suppress weed seeds. At the same time, Gardener's Gold compost supplies your soil with nutrients, organic matter and beneficial soil microbes that increase growth potential.

DIRECTIONS FOR USE

Use Gardener's Gold liberally wherever compost, humus or organic matter are needed in your lawn, flower bed or vegetable garden.

As a mulch:

- ✓ Use to control weeds and provide humus and nutrients for your soil and plants
- ✓ Cover flower beds and vegetable gardens with a 1" to 4" thick layer
- ✓ Circle trees and shrubs with a 1" to 4" thick layer
- ✓ Cover grass seed on newly sown lawns
- ✓ Use as patch material when sowing seeds in bare sections of lawns

As a nutrient supplement:

- ✓ Side-dress vegetables, flowers, shrubs and trees
- ✓ Incorporate when planting annual flowers and vegetable plants
- ✓ Place in planting holes for shrubs and trees
- ✓ Use in houseplant potting soil
- ✓ Mix in with seed starter mixes

As a soil amendment:

- ✓ Use liberally in garden soil or seed beds in spring
- ✓ Add to soil and rototill or turn soil over so that compost is mixed thoroughly with soil
- ✓ Add a ¼" to ½" layer over existing lawn and gently rake in

Gardener's Gold Premium Compost has been tested as an effective soil amendment and has received the Seal of Testing Assurance. It is produced with yard waste—leaves, brush and grass—collected and composted by Rumpke NPK Composting Farm. Composted for a minimum of 2 years, Gardener's Gold Premium Compost contains no animal wastes, sludge or industrial wastes.

Since 1997, Rumpke has been a regional leader in the solid waste industry, collecting yard trimmings from thousands of customers and transporting the trimmings to its composting farm. Rumpke NPK Composting Farm is registered as an Ohio EPA Class III and Class IV composting facility and is a member of the Ohio Compost Association and the United States Composting Council.
