

SEEDMASTER DISPENSER

FOR CONTROLLED SOWING OF A VARIETY OF SEEDS AND FERTILIZERS FOR
INDOOR AND OUTDOOR USES

Modern tool development for English gardeners to spread, dispense, distribute seed and fertilizer evenly, accurately.

EASY TO USE!

- Just place seed in broad part of trowel, tilt dispenser unit slightly forward.
- Use thumb to lightly rotate wheel, impulses propel seed evenly off tip, right where you wish to sow them.
- Stronger thumb pressure on the wheel causes vibrating action to increase.

SEEDMASTER I- (without baffles) for general use.

SEEDMASTER II- (with 4 seed proportioning baffles) for volume seeding. The appropriately sized baffle proportions the seed flow permitting faster seeding.

Should very small seeds cling to the plastic trowel, wipe with solution of household detergent and allow to dry.
