

# GROW TUB®

## Raised Bed

36" diameter, 8" deep circular design

Holds approximately 130 quarts or 5 cubic feet of soil media

Made from heavy-duty, non-woven geotextiles with built in wire rims & reinforced seams

Designed by Horticulturalists at Gardens Alive!®  
gardensalive.com

#1375  
Made in China

### Instructions

For best results, fill to 1½–2" from top of tub. Moisten media before planting. After filling tub with plants, scratch an all-natural fertilizer into the surface of the soil. Water thoroughly, making certain water is reaching the bottom of the tub. Because Grow Tub® Raised Bed is made with porous material, there's no such thing as too much water!

Some plants may require staking, i.e. tomatoes and grapes. Install your favorite stake or cage directly into the tub.

Once the season is over, Grow Tub® Raised Bed can simply be left in place for the following year. Or, the growing media can be removed and the tub allowed to dry. Then it can be folded and stored for winter— Grow Tub® Raised Bed can be reused for several years!

Depending on your grow zone, you may want to overwinter your perennial plantings in an unheated garage or other protective structure.

Grow Tub® Raised Bed can be placed on balconies, decks, porches, patios or directly into existing gardens and beds.

# GROW TUB®

## Raised Bed

- Create an instant garden for annuals, perennials or small fruits & vegetables
- New Rigi-Flex™ design makes it easy to set up and fill
- Ideal for limited garden space—great for balconies, decks, porches or patios
- Elevated plants are easier to harvest—typically no weeding required
- Once season is over, simply remove contents and fold flat for easy storage or leave in place so it's ready to go next spring
