

Blueberries Alive!TM

100% All-Natural Fertilizer

4-3-4

Specially designed for blueberries which require an acid soil environment to thrive. This formula contains specific ingredients which help acidify the soil and also contains mineral and trace elements that are necessary for superb plant growth.

Directions:

Apply at 1 lb. per 20 sq. ft. in late winter or early spring. Broadcast evenly under blueberry shrubs and incorporate (scratch into soil) into the top two inches of the soil. Be careful not to disturb roots. If roots are too shallow, water the fertilizer into the soil thoroughly.

For newly planted blueberry shrubs, apply 1 cup per plant in the hole at planting time. Water into the soil thoroughly, then place shrub in hole.

All ingredients are derived from plant and animal by-products.

Guaranteed Analysis

Total Nitrogen (N)	4%
Available Phosphate (P ₂ O ₅)	3%
Soluble Potash (K ₂ O)	4%

Net Weight 1 lbs.
