

HAND HELD SPRAYER

#68608

INSTRUCTIONS

Operating Instructions

- 1 Remove pump by turning counterclockwise allowing residual pressure to escape.
- 2 Prepare spray solution following directions on container label.
- 3 Fill tank with a maximum not to exceed fill capacity.
- 4 Re-insert pump into tank and tighten securely.
- 5 Pressurize sprayer with 20 to 25 strokes of the pump handle.
- 6 Point nozzle away from you and depress trigger lever to operate.
- 7 Adjust nozzle to desired spray pattern by turning nozzle cap from fine spray to pin stream.

Sprayer Cleaning

- 1 Rinse tank thoroughly with clean water.
- 2 Empty tank.
- 3 Refill tank with clean water.
- 4 Check pump barrel to be sure no dirt is stuck to barrel.
- 5 Place pump into tank opening and rotate clockwise until tightly locked and sealed in tank opening.
- 6 Pump plunger up and down 8-10 strokes.
- 7 Open shut-off and allow water to run through to clean discharge assembly.
- 8 Remove pump
- 9 Empty sprayer
- 10 Repeat steps 1 to 9- 3 times to ensure the sprayer is clean.

Sprayer Maintenance

- 1 Periodically remove and clean nozzle assembly.
- 2 Pump should be periodically oiled by putting 1 or 2 drops of oil down pump rod through opening in cover.
- 3 If the nozzle clogs:
 - a Remove complete nozzle assembly
 - b Disassemble nozzle
 - c Clean openings of any obstructions

Sprayer Storage

Do not store or leave any solution in tank after use.
