

Roses Alive!TM 3-5-3

All Natural Plant Food

Roses Alive! provides a special mixture of all natural plant food designed to encourage large blooms and strong root and plant growth. The Roses Alive! formula is a slow release formula which releases nutrients steadily as Nature intended. The moisture and temperature conditions which are ideal for vigorous rose growth, are the same conditions which govern the release of Roses Alive! nutrients. So as temperatures warm and moisture is available, rose growth and demand for nutrients increases, at the same time that slow-release nutrients are more readily available from Roses Alive!. Nature provides this perfect growing system.

Roses Alive! has a relatively high level of phosphorus, the nutrient most responsible for blooms. Phosphorus also encourages healthy roots.

Directions For Use:

Apply 1½–2 cups before the spring blooming period and 1½–2 cups before the fall blooming period. Sprinkle in a ring around the area below the outer leaves and work into the soil surface. Covering the soil with a mulch after scratching the Roses Alive! into the soil will help to keep nutrients available. For maximum response, add a cup of Roses Alive! during both spring and fall blooming periods.

3-5-3

Guaranteed Analysis

Total Nitrogen (N).....	3%
1.02% Water Soluble Nitrogen	
1.98% Water Insoluble Nitrogen	
Available Phosphate (P ₂ O ₅).....	5%
Soluble Potash (K ₂ O).....	3%

Derived from: alfalfa meal, poultry manure, bone meal, soybean meal, dried molasses, potassium sulfate.
