with respect to	Reference	1Pe 4:4
yet	Concessive	Hos 7:10

¹This list is not exhaustive, but an aid to identifying the logical relationships indicated by common English conjunctions, conjunctive adverbs, and prepositions.
The conjunction “and” has not been included because it can express many of the relationships.

²A Negative phrase beginning with “but” or “rather” shouldn’t automatically be made subordinate and given the label; rather, it may be the anchor phrase, and the preceding phrase subordinated and labelled Negative. If a phrase begins with “yet,” the context will show if it is the subordinate phrase, or if it should be the anchor phrase the Concessive phrase is subordinate to.

³The conjunctions “so” and “therefore” indicate a Ground relationship. However, the phrase introduced by the conjunction is not the Ground; rather, the phrase before it is the Ground.
