

***Gurney's*[®]**
**HEAVYWEIGHT FLOATING
ROW COVERS**

1.5 oz. per sq. yd.

These heavy weight row covers are still light enough to be laid directly on plants. They provide frost protection down to 24° F., yet still allow 50% of sunlight and some air and water to pass through. Since they allow light, air and water to pass, these covers can be left on plants for a few days; however it is best to remove them as soon as danger of frost is over. Plant growth will be slowed if covers are left in place for too long. It is especially important to remove covers on warm days as heat will build up. For extra protection, use two layers.

APPLICATION NOTES: Simply place over crops or ornamentals to be protected, leaving “slack” in cover. Use “U” pins or soil to hold covers in place.
