# A VISION THAT STANDS OUT

## Reliability + Experience + Value

With Vision Fitness, you get the reliability you need to set up a worry-free fitness center. Our equipment is built to withstand demanding environments without demanding too much of your time, energy or resources. Plus, we test relentlessly to ensure that every product meets our rigorous standards and exceeds your expectations.

When you choose Vision Fitness, you get the advantage of working with the innovative industry leader that has won more than 50 Best Buy awards. We were first to market with magnetic resistance, step-through bikes, extra-wide running belts, folding ellipticals and the Suspension Elliptical™ frame. Our vast industry experience lets you purchase with confidence and trust that you will get what you need.

At Vision Fitness, we prioritize quality and invest in features and technologies that improve the user or owner experience so that you get high-return equipment at every price point. Our goal is to keep your facility operating optimally. We do that by delivering durable equipment with attractive feature sets, and we support your purchase with world-class customer service and a global distribution network. More simply, value is at the forefront of everything we do.

# A PARTNER YOU CAN TRUST

Whatever your budget, space or timeline, our experts can work with you to select the right mix of equipment that meets all of your requirements. We will continue to support you with ongoing service, resources and information to help you maximize the return on your investment.

- Facility planning: We can help you determine how much equipment you need and which assortment makes the most sense.
- Custom design: We can create custom room layouts to help you visualize your equipment in your facility.
- Professional installation: Proper setup extends the life of your equipment, and we can get your new or renovated facility ready to launch on schedule.
- Award-winning customer service: Focus on managing your business and let us handle any worries or concerns that arise with our skilled team ready to assist you.

# SUSTAINABILITY IN FOCUS

As part of Johnson Health Tech, we consider sustainability in a broad sense. Because we recognize that the well-being of our employees, communities and environment has a direct impact on the success of our company, we operate with what we call a triple bottom line that balances people, planet and profit. Every year we produce a sustainability report and review policies that guide our efforts to promote wellness within our company, to minimize resource consumption (in our products and during production) and to help each of our subsidiaries incorporate sustainable practices where possible.

# EQUIPMENT THAT WORKS FOR YOU

Vision Fitness products are designed and tested to withstand the demands of high-use environments without sacrificing sophisticated and distinctive industrial design.

We also develop and incorporate exclusive technologies that improve functionality or enhance the customer experience. These innovations make it easier to use, maintain and own our equipment.

The Johnson Drive System is powered with a commercial AC motor for the most efficient, durable and responsive performance. Extremely reliable, AC motors have few internal components and require little ongoing maintenance. They run without internal friction, which keeps them cool and quiet during operation. Your guests and residents will also appreciate a treadmill that instantly adjusts to their speed and incline choices without lags or surges. Day to day, week to week, Vision Fitness treadmills deliver what you need.

Your guests and residents can jaunt through Rocky Mountain foothills or the American Northeast – all by stepping on a treadmill. Stunning, high-definition, forward-motion video syncs with the treadmill pace and incline. The sounds of gravel underfoot or hawks in the distance remind you that Virtual Active™ workouts take exercise places no other treadmill can go. The Elegant+ and Touch+ consoles include two Virtual Active workouts. Additional video packs are sold separately.

The exclusive Sprint 8® science-based high intensity interval training (HIIT) program burns more fat, builds more muscle and develops greater fitness with just three twenty-minute workouts per week. It is an efficient and effective fitness program that accommodates busy lifestyles and travel schedules. Your guests and residents can get great results without investing great amounts of time.

After extensive biomechanical and ergonomic research, we identified several key design elements that work together to create the most comfortable Suspension Elliptical™ workout. We call it PerfectStride™ technology, and it features a natural elliptical footpath, pivoting foot plates and a variable stride length at all incline levels. This produces a stride motion that mimics the body's true movement patterns. No other fitness trainer replicates the natural gait so closely.

## • T80

We designed and engineered the T80 treadmill to withstand hours of worry-free commercial use. Plus, the long deck and digital drive system give runners the space and consistent performance they need to maintain their training.

- Powerful 3.0 CHP AC drive system delivers smooth and reliable performance
- Extra-long, extra-wide deck accommodates a wide range of users
- Maintenance-free belt never needs lubrication
- Commercial-grade, reversible deck extends treadmill life
- Heavy-duty steel frame enhances durability
- Convenient toggle control grips allow for easy incline and speed changes

## CONSOLES

With the T80 you can choose from three consoles to get the features most appropriate for your guests or residents. Each offers intuitive operation, so any user can hop on and quickly adjust settings and fine-tune workouts.

### ● Touch+

Our top-of-the-line touchscreen console delivers the best in features and entertainment. It includes two Virtual Active workouts that take users to some of the world's most stunning and inspiring paths and trails. The wireless receiver enables heart rate training, and the iPod® and iPhone® compatibility allows users to control their devices through the touchscreen while they exercise.

### ● Elegant+

Redesigned with a touchscreen display, the new Elegant+ console offers variety with 15 diverse programs. Users eager to make the most of their time will appreciate the Sprint 8 workout that delivers maximum results in just three twenty-minute workouts per week. The quick-touch keys enable easy speed and incline changes, and the wireless receiver tracks heart rate for more advanced training.

### ● Classic

This is the console that gets things started. The simple interface and extra-large display make it ultra-accessible. It's a true get-on-and-go console that your guests and residents can use whether they have a little or a lot of experience with fitness equipment.

## • S70

With our exclusive PerfectStride technology, this Suspension Elliptical trainer promotes natural body positioning. The variable path of motion offers workout variety.

- PerfectStride motion is fluid, natural
- Variable stride length and multi-position grips let users tailor workouts
- Power incline enhances workout variety
- Self-powered generator offers placement versatility
- Heavy-gauge steel frame ensures durability
- Large, cushioned pedals ease joint stress
- Narrow pedal spacing promotes good posture
- Bright LED display is readable at any angle

## • S60

The unique suspension design provides an exceptionally smooth feel, utmost comfort and unmatched accessibility. Plus, the cord-free operation gives you greater freedom of placement.

- Durable Suspension Elliptical frame minimizes maintenance
- Self-powered generator offers placement versatility
- Heavy-gauge steel frame ensures durability
- Large, cushioned pedals ease joint stress
- Narrow pedal spacing promotes good posture
- Bright LED display is readable at any angle

## • R70

A step-through frame and Club Comfort Arc™ seat with lumbar support make the R70 an accessible recumbent bike for users of all ability levels.

- Step-through frame enhances accessibility
- Self-powered generator offers placement versatility
- User-friendly seat adjustment mechanism makes it easy to find an ideal riding position
- Convenient accessory tray provides ample storage space for gadgets and gear
- Remote control grips enable quick workout adjustments
- Heavy-gauge welded steel frame enhances stability and durability
- Bright LED display is readable at any angle

## • U70

Advanced programming keeps workouts interesting, while the durable frame keeps the U70 upright bike operational even in high-use environments.

- Multi-position handlebars enable a variety of users to find a comfortable grip
- Self-powered generator offers placement versatility
- Club Comfort Arc™ upright seat provides support
- Heavy-gauge welded steel frame enhances stability and durability
- Bright LED display is readable at any angle

## • V-SERIES

With a stainless steel seat post and handlebar stem, the V-Series indoor cycle is durable enough for a class setting and still perfect for indoor training during the off-season.

- Zinc-coated, high-tensile steel frame prevents rust and corrosion
- Micro-adjustable handlebar and seat accommodate a variety of users
- Heavy 40 lb. / 18 kg flywheel ensures a smooth, effective workout
- Large, oversized bearings in bottom bracket increase longevity
- Optional computer provides valuable workout feedback

## • ST710

Designed to fit in virtually any room, the ST710 Multi-Station Gym provides three work stations on two weight stacks.

- Top-of-the-line cables ensure smooth movements
- Exercise placards are easy to read and understand
- Convenient accessory storage keeps your fitness space organized and neat
- Double-stitched upholstery and contoured pads are durable and comfortable

## • ST700

The ST700 Functional Trainer, which accommodates dozens of different exercises, is sturdy and durable enough for years of heavy use.

- Wide, open-based frame accommodates a bench, stability ball or wheelchair
- Integrated handgrips allow for pull-ups, core work and stretching exercises
- Top-of-the-line cables ensure smooth movements
- Convenient accessory storage keeps your fitness space organized and neat

## • ST780

The ST780 Adjustable Bench is durable, compact and portable.

- Three-position seat and seven-position backrest accommodate a wide variety of users
- Handle and transport wheels make it easy to move or reposition the bench
- Double-stitched upholstery and contoured pads are durable and comfortable
