\*\* Any similar size of bottle with base no larger than 40mm diameter can be used with the Soap.

#### Instructions

1. Insert 2 x AAA batteries into the battery compartment.
2. Place **ONLY ONE** stir bar within the ink inside the bottle. The minimum ink level needs to fully cover the stir bar.
3. Place bottle on top of the ink stirrer. Slide on the thumbwheel located on the side of the Soap slowly to set the desired speed of spinning.

#### Tips

- The big stir bar generates stronger stirring action, good for stirring thick ink like acrylic ink or mixing metallic powdered ink, the small stir bar generates smoother action for stirring light ink.
- When the stir bar jumping inside the bottle instead of spinning quietly in the middle, that indicates the speed is too fast. Turn the thumbwheel to the left to slow down the spinning speed, or turn it off and on again.

#### Caution

- This is not a soap, do not put it under water.
- Contains small parts. Choking hazard.
