Kelley Drye represents Global Telecom and Technologies in Acquisition of Data Transport Business of Inteliquent

Kelley Drye has done a series of telecom acquisitions for client Global Telecom and Technologies (GTT) over the past few years as they transform from a Network Reseller to a Network Operator. Kelley Drye assisted GTT in acquiring the data transport business of Inteliquent, which is crucial to GTT since it would vault them to become the 5th largest IP transit service provider worldwide. The biggest challenge facing GTT was that they had to close the deal within 30 days, before a competing bidder and a group of dissident Inteliquent stockholders could derail the process.

Kelley Drye was able to successfully complete a series of complicated transactions for GTT that enabled the acquisition to close on that final, 30th day. Within that 30-day window the attorneys involved went from zero to sixty on the acquisition, they negotiated the full Purchase Agreement and closed; negotiated and put in place an entirely new Senior Secured Credit Facility to significantly increase GTT's borrowing capability and pay off its existing senior lender; renegotiated GTT's Mezzanine Debt Facility to add a new lender and significantly increase the

amount of borrowing capacity; launched and completed an institutional private placement of GTT stock to support the increased debt load; and negotiated and signed a number of commercial agreements between Inteliquent and GTT that apply post-closing.
