

Kelley Drye Adds Leading Technology Attorney Scott Doyle

June 1, 2022

Kelley Drye & Warren LLP announced that prominent patent litigator [Scott Doyle](#) has joined the firm as partner. Scott focuses his practice on patent and intellectual property infringement actions, having successfully first-chaired numerous cases in federal district courts, before the United States Patent Trial and Appeal Board, and at the United States International Trade Commission.

Scott has decades of experience handling litigation involving a broad range of technologies, including telecommunications, internet, computer hardware and software, automotive, chemical compositions, medical devices, semiconductor, and biotechnology. He has represented some of the world's largest and most technically sophisticated companies, including Daimler/Mercedes Benz, Schlumberger, Nikon, IMAX, and WebMD. Outside the courtroom, he is well versed in leading arbitrations and mediations involving intellectual property issues.

Scott's prior work with Section 337 actions at the ITC provides a strong complement to Kelley Drye's renowned international trade practice and delivers an important expansion to the capabilities of the firm's patent practice group.

"Scott's addition to the Patent practice represents a key step in our efforts to expand the firm's capabilities, and builds on the recent addition of patent attorney Michael Weil as a senior associate in the Chicago office," said [Dana Rosenfeld](#), Kelley Drye managing partner. "His extensive experience, especially in Section 337 and Inter Partes Review (IPR) cases, will provide additional resources to deliver the results and level of service that our clients depend on."

Scott has considerable experience managing IPR cases before the U.S. Patent Trial and Appeal Board, and he has argued several appeals before the U.S. Court of Appeals for the Federal Circuit. He has also worked on a wide-range of technology-related transactions, including buyouts, mergers and acquisitions, investments, and patent portfolio sales, and on many forms of technology agreements, including licensing agreements, employment agreements, and development agreements.

"The reputation the firm enjoys for both international trade and patent litigation is outstanding," said Scott Doyle. "The opportunity to work with best-in-class lawyers who are great, collegial people, made the decision to join Kelley Drye easy."

Scott received his L.L.M. with highest honors from George Washington University, his J.D. from George Mason School of Law, his M.B.A. from Georgetown University, his M.S. in Electrical Engineering, Communications and Computer Systems from George Washington University, and his B.S.E.E. from Virginia Tech.

Prior to joining Kelley Drye, Scott was the national chair of the IP litigation practice at Fried Frank, served as the global chair of IP litigation at Shearman & Sterling, and was the national chair of

Greenberg Traurig's Section 337 practice. He also served in various in-house counsel roles, most notably as General Counsel and Corporate Secretary for Engage Mobilize, Inc., a technology and software provider in the oil and alternative energy markets.
