

Podcast: C-Band Reform

[Chip Yorkgitis](#)

February 13, 2020

Following a recent episode on the FCC's C-Band Proceeding addressing use of the 3.7-4.2 GHz spectrum range, Partner Chip Yorkgitis is back to discuss the recently released draft Report and Order, which is expected to be adopted at the FCC's February 28th meeting. The Order would transition the use of the C-Band to make the 280 megahertz from 3.7 - 3.98 GHz available for flexible use through an auction to be held this year.
