

# Podcast: Challenges Ahead in Implementing STIR/SHAKEN

December 1, 2020

In the latest episode of [Full Spectrum's](#) Inside the TCPA series, we discuss a series of FCC orders that require implementation of a call authentication framework called STIR/SHAKEN. It covers the FCC's anti-robocall program, the specifics of STIR/SHAKEN, its implementation requirements and deadlines, and other implications for service providers, including what might be ahead in 2021.
