

RDOF - LEO Satellite Assessment

Fiber Broadband Association Webinar

Speaking Engagement

February 16, 2021 from 11:00 am to 12:00 pm (EST)
Washington, DC

The Fiber Broadband Association commissioned research firm Cartesian to develop an independent analysis and a model to help the FCC analyze whether Starlink is likely to meet the RDOF public interest obligations.

The results of this study indicate that Starlink will fail to meet the RDOF public interest requirements on a nationwide basis, with over 56% of subscribers expected to experience service degradation during peak periods. This expected service degradation will worsen and significantly impact all its awarded RDOF locations if Starlink's broadband capacity is also offered to (non-RDOF) commercial subscribers.

Join partner [Tom Cohen](#) for a webinar on the impacts of the survey's predictions.
