

# The Bots are Coming: The Future and Implications of Price-Fixing Algorithms

Firm Event

July 25, 2017 from 12:00 pm to 1:00 pm (EDT)

New York

Webinar

In concentrated markets, one would expect oligopolistic or parallel pricing; it is not illegal.

Using a bot to do that just makes the process more efficient. With the ever increasing use of price-setting algorithms and bots to set prices, what can companies do to keep their bots out of the crosshairs of regulators?

Please join Kelley Drye Partner [David Evans](#) for a discussion on price-setting bots. The webinar will cover the antitrust issues surrounding price-setting bots and summarize significant new developments.
