

# The Interface Between Competition and Consumer Policies

[William C. MacLeod](#)

February 13, 2008

This article was submitted by the Business and Industry Advisory Committee (BIAC) for the OECD Global Forum on Competition held on February 21 – 22, 2008. The article notes that the scope of intersection between consumer policy and competition policy is significant and the objectives of the two disciplines should be melded together as much as possible.
