Workshop on Cloud Computing and Wireless Networks

Wireless Telecommunications Symposium

Speaking Engagement

April 16, 2015 from 2:00 pm to 3:45 pm (EDT)
Chicago
New York, NY

Senior associate Michael R. Dover will present "Workshop on Cloud Computing and Wireless Networks" at the 2015 Wireless Telecommunications Symposium. His presentation will address 21st century concerns with cloud computing and its specific application to wireless networks. Mr. Dover will cover the most popular cloud computing service models, and the technology and infrastructure underlying cloud computing networks and how cloud computing can improve business and efficiency. During the session, he will also highlight several best practices and regulatory responsibilities that companies should consider.
