### **Tek Pal Set Up Procedures**

1. Turn on the TV manually or using your old remote.
2. Press and HOLD the ON/OFF button and the MUTE buttons together for approximately 3 seconds until the indicator light comes on.
3. Press and release the CH+ or CH- button until the TV turns off.  
\*\*Please note that you may have to press and release the CH+ or CH- many times, as there more than 100 potential codes in the remote--up to approximately five minutes. (Each time you press the Channel button the remote will attempt the next code - when it finds the correct code, your TV will shut off).
4. Press the MUTE button immediately after the TV shuts off to complete set-up.
5. Turn the TV back on.
6. Test the Volume, CH+, CH-, On/Off and Volume buttons. If any of the buttons do not work, proceed with set up procedures again to find a better code.

The Tek Pal is NOT compatible with TVs hooked up directly to cable box or satellite receiver.
