

## PROCLIP Cellular PVC Fastener

### PRODUCT DESCRIPTIONS

Heavy gauge Stainless steel fastener with black oxide coating to better hide fastener between boards.

### PRODUCT REQUIREMENTS

Proclip Fasteners are designed to work with Cellular PVC deck boards without outer shell. Be sure to use the correct fastener with your decking. When using PVC decking with outer shell the TC-3S fastener recommended.

When using Tiger Claw fasteners, be sure to carefully read installation instructions to obtain optimum results. Failure to properly follow instructions may result in void of warranty.

Inspect decking material prior to installation. Omit any planks that contain hooks, twists, splits, cracks, or other defects.

Be sure to follow decking manufacturer's recommendations for board spacing.

### PRODUCT FEATURES & COMPATIBILITY

Proclip fasteners are constructed of .060 ¼ roll hardened stainless steel.

Designed specifically for cellular PVC decking material no less than 1" in thickness. Proclip will work in the following decking lumber varieties:

- Azek

**IMPORTANT NOTE: Proclip should NOT be used with composite decking.**

All work can be done quickly from above using basic tools (hammer, screw gun)  
Proclip will automatically create 1/8" spacing between each board

Please consult your lumber professional or ask us for recommendations first if you plan to use any other type of decking for your project.

### Coverage

A fastener is needed at every intersection of a joist and decking board. Using 5.5" decking with 16" on center joist:

90 pcs. box covers approx. 50 sq.ft.

1400 pcs. bucket cover approx. 750 sq.ft.

Or:

Square footage x 1.75 = Number of Fasteners

For other configurations:

# Decking boards x # Supports = # Fasteners. Fasteners / 90 = # Boxes (round up to next box)
