Maintenance

Aluminium & Steel

These will be chrome plated, bright polished or powder coated depending on the components & finishes of your chair. These parts can be cleaned with a damp cloth & in the case of polished or chrome parts, buffed dry with a soft non-abrasive cloth to prevent streak marks. For chrome plated finishes, stubborn stains can be removed using a metal cleaner. Do not use abrasive cleaning agents in case of damage.

Wood

Dust regularly. Clean hard surfaces with a damp cloth & then polish with a soft dry cloth, microfibre cloths are ideal for both purposes. Polish in the direction of the grain. **DO NOT** use spray polishes/cleaners or waxes which may damage the finish & result in an undesirable sheen & a sticky build-up which can be difficult to remove.

For heavier general soiling & marks on hard surfaces soak a cloth in a mild solution of soapy water, wring until damp, not dripping wet, & wipe the surface concerned. Then wipe with a clean, not soapy, damp cloth & finish by drying with a soft cloth.

To remove tape/sticker residue, grease, chewing gum, make-up & adhesives, try 'De-solv-it Sticky Stuff Remover', available on line & in some hardware stores. Other stubborn marks can sometimes be removed with Isopropyl Alcohol, available from Chemist. Use both these sparingly & with care.

Mesh

Vacuum regularly & occasionally wipe clean with a damp cloth.

Plastic

Wipe with a damp cloth periodically. Dust can gather in some hard to reach areas, particularly between the seat & back of a task chair. Stubborn stains (pen etc) may require a mild household cleaning agent to remove – particularly on light coloured plastic components. Do not use any abrasive cleaning products on plastic parts as these may damage the surface.

Maintenance

Nylon Parts

Wipe with a damp cloth periodically.

Leather & Fabric Upholstery

Refer to manufacturers cleaning guidelines for individual fabric details. In general most fabrics can be vacuumed regularly & wiped clean with a damp cloth or shampoo using a proprietary upholstery shampoo.

Minimise the risk of damage

- Avoid over exposure to direct sunlight.
- Avoid exposure to excessive heat from a fire, radiator or local high temperature light sources.

General - Following these simple maintenance procedures will enable trouble free use. Should any components appear to be loose the cause should be investigated without delay & the appropriate fixing tightened where possible. If this does not provide a solution please contact Alchemy Furniture.

Warranty

Alchemy offer a five year guarantee for furniture unless stated.

This applies only if the furniture & other supplied goods have been used within and by standard office conditions & installed correctly as per Alchemy installation & relocation instructions.

Alchemy reserve the right to refuse replacement or repair if we feel that the product has been abused or has been accidentally damaged by another party.

Alchemy also reserves the right to attempt to repair any damaged or faulty products before a decision is made to replace them. In this case, we shall not be liable for any loss occurred by the distributor, customer or 3rd party during this period.

Alchemy will not be liable whatsoever for any consequential damages, loss or other expenses whether arising out of contact, negligence or otherwise.

Any alterations to our products in any manner will automatically nullify any guarantees offered by Alchemy.
