Fence

Fence is a modular divider of space, freestanding it gives the total flexibility that a modern working environment demands. Use Fence to create a mix of collaborative & personal spaces, specify accessories to give visual & acoustic seclusion or leave the modules open to create zones without closing down the space and restricting natural light.

Office floor plates have to be adaptable & responsive demanding fast, cost effective reconfiguration, the free standing design ethos of Fence allows you to achieve this.

A combination of timber panels, steel frames & storage carcasses combine to enclose open plan areas creating team neighbourhoods & social huddles whilst defining circulation paths without the need to build fixed floor to ceiling walls.

The flexibility of the simple modular design combined with a wide range of finishes leaves the specifier free to create unique combinations of product that can be updated, reconfigured, closed & opened up as the needs of the business evolve. Visual & acoustic privacy can be scaled up & down as work styles dictate. The grid style of the product can be emphasised or floating horizontal lines given more prominence by mixing the wide range of finishes in alternative combinations.

Fence with Privo sofas & tables

Shared Desk Space

Drop In Space

Informal Presentation Space

Fence divides open plan space and in this example has created an informal presentation area, coffee come drop in area and shared desk zone.

A mix of accessories have been used to encourage idea sharing, create visual & acoustic privacy, storage space & impromptu meeting environments.

We earn
trust through
our actions
and attitudes.

succeed

Fence with Podium drop in high table & Involv stools

Panels can be suspended from the frame increasing visual & acoustic privacy.

A wide range of panels are available from image & acoustic fabric covered panels to drywipe, blackboard & pinboard panels.

The specifier is able to propose any panel product & we will investigate it's suitability and integration into our system.

Stowaway stools sit within Fence shelf modules creating a visual & acoustic baffle when not in use

Shelves can be specified at different lengths allowing off grid division of vertical space to accommodate objects of varying height.

Fence with Involv table

Removable acrylic screens slot into the work surface

The Involv touchdown table with SmartTops allow dividing screens to be slotted into position by the occupant creating a temporary visual barrier. With all dividing screens removed the worksurface is returned to a team meeting table.

Fence accessories include a rack for storing the screens when not required.

Fence seat arbour

Fence offers the possibility of many combinations from just a few module options. Base frames, open base unit, sliding door, hinged door & seat pad option can be combined with add on shelf modules, dry wipe & pinboard alcove, flat screen housing, lockers & seat arbour.

Combine this with cladding panels, 7 MFC finishes & 3 metalwork finishes to open up endless possibilities. We see Fence as the starting point & working with designers & specifiers further project specific finishes & storage modules & combinations can be developed.

Fence as a simple shelf module against a wall.

Low Fence sitting behind Privo sofas

By contrasting the finish of the horizontal shelves with the vertical frame a linear aesthetic is created.

The Fence shelf module is coordinated with the Involv barrel shaped table with black Fenix work surface, the legs are white. White leather Kurv high back chairs completes this minimalist solution.
