Involve barrel shaped table in white with chamfer edge. Involve stools & Elixir mesh back meeting chairs

Involve rectangular poseur height table with Involve high stools

Involve tables combine a robust steel frame with the beauty of natural Oak. The modular underframe allows 1,2 & 3 piece tops that can be built into tables up to 7200mm long x 1400mm wide.

From simple square & circular tops to large rectangles, obround, boat & barrel shapes. There are also Involve poseur height tables, credenzas & coffee tables. Why not specify the smaller tables as desks, cable trays & a clever fabric cable riser will guide cables from floor to work surface. The range also includes low & high stools with the same solid Oak legs & robust underframe.

We have our standard square edge work surface profile along with a chamfered edge on an MDF substrate. There are 7 standard melamine finishes but we will look at other project lead finishes upon request. We have experience of supplying alternative MFC finishes, laminates such as Fenix, compact laminate, birch ply, birch ply with laminate face, birch ply with lino face & veneers.

Involv rectangular table with chamfered edge, shown with an eclectic mix of Alchemy seating featuring timber.

The Involve stool range complements the table system with solid Oak legs providing a robust & stable underframe. Involve stools are available as single seat & two seat low stools along with the high stool with foot ring. They can be specified with a plain seat or a central fabric covered button.

Involve poseur height tables with matching high stools.

Poseur height table with solid Oak legs & robust steel underframe

Boat shaped coffee table

Fabric cable riser

Involv tables combine the strength of a steel frame with the touch of real timber Oak legs. This allows the specification of large multi piece tops without compromising strength & stability.

The system can be connected to provide power & data connectivity by specifying cable trays & the stylish zipped fabric cable riser to run cables up the leg & via the cable trays to the worksurface. Sockets can also be fitted under the work surface.

The Involv range also includes coffee table options.
