

pedestal

table programme

Sometimes the simplest ideas are the best, like pedestal base tables. The column that supports the table top forms the cable riser bringing power & data to the surface hidden from view. From small coffee tables to large meeting configurations, Ped is truly versatile.

Overview

Base – constructed from medium & heavy gauge mild steel tube & plate, powder coat finish black, grey, silver, clear lacquer over steel.

Tops – 25mm MFC with square edge

25mm MFMDf with chamfered edge

Cable Management – by specifying the cable managed option the base will be supplied with a through hole in base, through tube upright & top plate. Tops are machined on the underside to allow cables to exit the top plate & feed to the table top or cable tray.

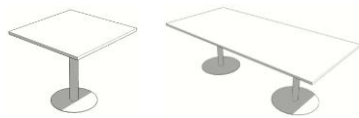

Cable trays attach to the underside of the tops & flip down for access.

Options – Round or square base plates, polished stainless steel base cover.
