Available Finishes for Bed Ends

Cafelle finish available upon request

Spring Unit & Tool-Less System

The metal spring unit features a center support bar and 9-gauge, no-sag sinuous wire that ensures comfortable support.

The Tool-Less System allows you to quickly go from one height to the next without the use of tools. Simply choose between the 11 height settings, place the spring or bedrail over steel dowels and tap with hand into place to lock, and with the steel bunking pins, quickly loft your bed into endless configurations.
