Recent Related Programs:
- Diagnosing and Managing AML: Understanding Disease Presentation
- What Emotional Side Effects Do AML Patients Face?
- Emerging Research and Promising AML Treatment Approaches

UNDERSTANDING CLINICAL TRIALS
- National Cancer Institute: leader in cancer research
- Leukemia & Lymphoma Society: health organization dedicated to blood cancers
- Clinical Trials: database of privately and publicly funded clinical studies conducted around the world
- National Comprehensive Cancer Network: resource for patient care, research, and education
- U.S. Food & Drug Administration: latest on drug approvals and ensures safe and effective drugs are available to improve the health of people in the US

KEY TIPS
- Understand your personal AML situation & learn about your type of AML
- Discuss available options with your doctor
- Consider participating in a clinical trial if fitting/available
- Take action you are comfortable and confident in
- Seek support from those around you and available resources
- Continue to have dialogue with your entire care team before, during, and after treatment

ASK YOUR DOCTOR OR NURSE NAVIGATOR ABOUT
- What type of AML do I have?
- What testing can be useful for treating my AML?
- What treatments are available to me?
- What can I expect from treatment in terms of physical and emotional impact?
- How will this diagnosis and treatment impact my daily life?
- What resources are available to me at this time?
- What options will be available to me should I need treatment again?
