How to: Recover your Touch Dynamic factory OS.

**WARNING: This will erase the entire contents of your drive.**

Step 1: When the system is powering up, right after the POST screen, you will see the Windows Boot Manager window appear for 2 seconds. Please use your arrow keys to select “Touch Dynamic Recovery”. You must move either arrow before this screen disappears. Then press “Enter”. Please see diagram 1-1

Diagram: 1-1
Step 2: Select the keyboard layout and select “Next”.

Please refer to diagram 1-2.

Diagram: 1-2
Step 3: Make sure the Touch Dynamic Recovery is highlighted and select “Next”. Please refer to Diagram 1-3.

Diagram: 1-3
Step 4: Once the “System Recovery Options” window, select the “OEM Factory Restore” link. The “Touch Dynamic Restore Utility” window will appear. Select the “Restore” button.

Diagram 1-4
Step 5: At this point the Microsoft “End User License Agreement” will be displayed. Please read the license, and select “Accept” if the terms displayed are ok. Please refer to diagram 1-5.

Diagram 1-5
Step 6: The “Confirm Restore” window will be displayed. Select “Yes” to continue. *Once again, please be advised, that this will completely erase everything from your hard drive.* Please refer to diagram 1-6
