

WARNING

*This portable lamp has a polarized plug (one blade is wider than the other) as a safety feature to reduce the risk of electric shock. this plug will fit in a polarized outlet only one way. if the plug does not fit fully in the outlet, reverse the plug, if it still does not fit, contact a qualified electrician.

*Never use with an extension cord unless the plug can be fully inserted. do not attempt to defeat this safety feature.

CARE AND MAINTENANCE

*Unplug lamps before using any cleaning solutions. Dust shades with a feather duster or with an appropriate vacuum-brush attachment. Wipe with a soft, dry cloth and clean lamp bases with the methods appropriate to the material. Avoid the use of chemicals and household cleaners as they may damage the finish.

PLEASE USE ON/OFF TYPE "A" BULB MAX 40-WATT OR LED BULB MAX 9-WATT. THERE IS LED 4-WATT BULB IN THE BOX

 The diagram shows a lamp base with a curved arm (A) and a power cord. A light bulb (D) is being inserted into a socket (C) at the end of the arm. A triangular lamp shade (B) is shown above the socket, with an arrow indicating it should be placed over the arm and socket assembly.	 The diagram shows the lamp arm (A) with the bulb (D) inserted into the socket (C). A nut (E) is being screwed onto the arm, securing the shade (B) in place. An arrow indicates the direction of rotation for the nut.	 The diagram shows the fully assembled lamp. The lamp base is on a level surface, and the lamp arm (A) is extended upwards, holding the bulb (D) and shade (B). The power cord is visible at the base.
Step 1: Insert the bulb (D) into the socket (C). Put the shade (B) on the Lamp body (A). Be careful not to twist the power cord and tighten securely.	Step2: Screw the Nut (E) onto the Lamp body (A).	Step 3: Put the light on a level surface to check if everything is stable.
