

WARNING

*This portable lamp has a polarized plug (one blade is wider than the other) as a safety feature to reduce the risk of electric shock. this plug will fit in a polarized outlet only one way. if the plug does not fit fully in the outlet, reverse the plug, if it still does not fit, contact a qualified electrician.

*Never use with an extension cord unless the plug can be fully inserted. do not attempt to defeat this safety feature.

CARE AND MAINTENANCE

*Unplug lamps before using any cleaning solutions. Dust shades with a feather duster or with an appropriate vacuum-brush attachment. Wipe with a soft, dry cloth and clean lamp bases with the methods appropriate to the material. Avoid the use of chemicals and household cleaners as they may damage the finish.

 The diagram shows a lamp with a conical base (A) and a semi-cylindrical shade (B). A power cord is attached to the base. A curved arrow indicates the shade (B) being pulled down towards the base (A) to connect the cord.	 The diagram shows the lamp with the shade (B) attached to the base (A). A socket (C) is located on the underside of the shade. Two bulbs (D) are shown being inserted into the socket (C). A curved arrow indicates the shade (B) being pulled down to reveal the socket.	 The diagram shows the lamp with the shade (B) attached to the base (A) and the power cord connected. The lamp is shown on a level surface, indicating it is ready for use.
Step 1: Pull power cord to connect the shade (B) to the Base (A). Screw the shade (B) onto the Lamp base (A). Be careful not to twist the power cord and tighten securely	Step2: Insert two bulbs(D) into the socket(C).	Step3: Put the light on a level surface to check if everything is stable.
