of Pediatrics

DEDICATED TO THE HEALTH OF ALL CHILDREN®

Vaccines and Medications in Pregnancy
Surveillance System (VAMPSS)

You're invited to a Congressional briefing hosted by the Society for Maternal-Fetal Medicine (SMFM).

The briefing is cosponsored by the American College of Obstetricians and Gynecologists; March of Dimes; American Academy of Pediatrics; Association of Women's Health, Obstetric and Neonatal Nurses; Genetic Alliance's Expecting Health; National Association of Nurse Practitioners in Women's Health; Treatment Action Group; and Vaccines and Medications in Pregnancy Surveillance System.

The Next Frontier: Research in Pregnant Women and Breastfeeding Women

Thursday, November 15, 2018

12pm noon

SR-188

Lunch will be available

Investment in research in pregnancy and the postpartum period is critical to optimize the health of women and their families. Much of the evidence that guides obstetric and postpartum practice is generated from studies that are funded by the NIH. Join us to hear more about the work of the *Eunice Kennedy Shriver* National Institute of Child Health and Human Development, as well as the challenges and opportunities faced by industry to including this population in clinical trials.

Speakers include:

- Dr. Diana Bianchi, Director, *Eunice Kennedy Shriver* National Institute for Child Health and Human Development
- Dr. Brian Robinson, Senior Vice President for Medical Affairs, AMAG Pharmaceuticals
- Dr. Cynthia Gyamfi-Bannerman, Principal Investigator, Columbia University Maternal-Fetal Medicine Units Network

RSVP to Katie Schubert at kschubert@smfm.org

This is a widely-attended event.
