The Addis Clinic, Inc.
1003 Halcyon Ave
Nashville, TN 37204

Dear Interested Physician,

Thank you for your interest in volunteering with The Addis Clinic! As a non-profit organization that utilizes telemedicine technology to serve multiple partner organizations internationally, our specialty physician network is at the heart of our work. Without the dedication of our experienced and caring physicians, we could not support frontline health workers with expert consultations enabling them to provide superior care to patients who need it most.

The Addis Clinic originated after our founding board members served on a medical trip to Addis Ababa, Ethiopia. While providing specialty medical services at Ethiopia ACT (previously known as AIDS Care and Treatment) and witnessing the dire need for specialty medical care, the vision for The Addis Clinic was born. The desire was to build an organization with the capacity to provide expert medical consultations to healthcare providers in low resource countries where access to specialty medical care is limited, while adding value to the existing healthcare system in a cost effective and culturally appropriate way. Included with this letter is the “New Volunteer Physician Packet”. It includes: (1) Frequently Asked Question Sheet for Volunteer Physicians, (2) Consultation Policy for Physicians, (3) Three-minute telemedicine platform training video, and (4) Example of a recently completed case. At your request, we can also supply extensive information on international telemedicine laws and our remote collaboration agreement signed between The Addis Clinic and each of our partner organizations.

We are thrilled to have you join us and are available to answer any questions you may have. We appreciate your consideration in dedicating your time and skills to our work.

Sincerely,

Michelle Turner
Executive Director
