

Maternal mortality rates in the United States are rising. The U.S. has the highest rate of maternal death among developed nations with significant racial disparities and large differences in rates between states. The Society for Maternal-Fetal Medicine (SMFM) has identified five important ways that states are addressing the rising rates of maternal mortality: 1) the establishment of maternal mortality review committees, 2) the establishment of perinatal quality collaboratives, 3) the expansion of Medicaid, 4) reporting of maternal death data stratified by race/ethnicity, and 5) participation in the Alliance for Innovation on Maternal Health program. This fact sheet details the progress Rhode Island has made toward reducing maternal mortality. To view other state fact sheets, visit SMFM.org/scorecard.

Efforts by Rhode Island to Prevent Maternal Deaths

Pregnancy-Related Mortality Ratio

(number of pregnancy-related deaths per 100,000 live births)

Race	Rhode Island*	USA
American Indian	-	28.3 [^]
Asian or Pacific Islander	-	13.8 [^]
Non-Hispanic Black	-	41.7 [^]
Hispanic	-	11.6 [^]
Non-Hispanic White	-	13.4 [^]
Overall	-	17.3 ^{**}

**2017 | [^]2014-2017

*Data forthcoming. Rhode Island's maternal mortality review committee began reviewing cases in 2020.

Insurance Coverage for Reproductive-Aged Women and New Mothers in Rhode Island

6%

of women 15-44 years of age are without health insurance.

Rhode Island's Medicaid program covers pregnant people up to

195%

of the federal poverty level.

Pregnant people and new mothers with monthly incomes of

\$3530

or less are eligible for Medicaid coverage (family of 3).

Many new mothers lose Medicaid coverage

60

days after giving birth.

Postpartum Medicaid Extension

SMFM recommends that states provide 12 months of comprehensive postpartum Medicaid coverage to all new mothers.

State Actions Aimed at Reducing Maternal Deaths

Maternal Mortality Review Committees

- Gather and analyze data and
- Make recommendations

Driving Action by

Perinatal Quality Collaboratives

- Building the infrastructure for and advancing system-wide quality improvement efforts

AIM

- Implement patient safety bundles

Policymakers

- Advance policy reforms, including expanding and extending Medicaid coverage

Rhode Island's Maternal Mortality Review Committee

Rhode Island's maternal mortality review committee was established in 2019 and began reviewing cases in 2020. Website and committee report are forthcoming.
