

Kentucky

Maternal mortality rates in the United States are rising. The U.S. has the highest rate of maternal death among developed nations with significant racial disparities and large differences in rates between states. The Society for Maternal-Fetal Medicine (SMFM) has identified five important ways that states are addressing the rising rates of maternal mortality: 1) the establishment of maternal mortality review committees, 2) the establishment of perinatal quality collaboratives, 3) the expansion of Medicaid, 4) reporting of maternal death data stratified by race/ethnicity, and 5) participation in the Alliance for Innovation on Maternal Health program. This fact sheet details the progress Kentucky has made toward reducing maternal mortality. To view other state fact sheets, visit SMFM.org/scorecard.

Efforts by Kentucky to Prevent Maternal Deaths

Pregnancy-Related Mortality Ratio (PRMR)

(number of pregnancy-related deaths per 100,000 live births)

| Race | Kentucky* | USA |
|---------------------------|-----------|--------------------|
| American Indian | - | 28.3 [^] |
| Asian or Pacific Islander | - | 13.8 [^] |
| Non-Hispanic Black | - | 41.7 [^] |
| Hispanic | - | 11.6 [^] |
| Non-Hispanic White | - | 13.4 [^] |
| Overall | - | 17.3 ^{**} |

**2017 | [^]2014-2017 | *Kentucky does not report PRMR details at this time. Available state data can be found in the latest maternal mortality review committee report: <http://bit.ly/KYMMRCReport2019>.

Insurance Coverage for Reproductive-Aged Women and New Mothers in Kentucky

8%

of women 15-44 years of age are without health insurance.

Kentucky's Medicaid program covers pregnant people up to

200%

of the federal poverty level.

Pregnant people and new mothers with monthly incomes of

\$3,620

or less are eligible for Medicaid coverage (family of 3).

Many new mothers lose Medicaid coverage

60

days after giving birth.

Postpartum Medicaid Extension

SMFM recommends that states provide 12 months of comprehensive postpartum Medicaid coverage to all new mothers.

State Actions Aimed at Reducing Maternal Deaths

Maternal Mortality Review Committees

- Gather and analyze data and
- Make recommendations

Driving Action by

Perinatal Quality Collaboratives

- Build the infrastructure for and advance system-wide quality improvement efforts

AIM

- Implement patient safety bundles

Policymakers

- Advance policy reforms, including expanding and extending Medicaid coverage
