

Maternal mortality rates in the United States are rising. The U.S. has the highest rate of maternal death among developed nations with significant racial disparities and large differences in rates between states. The Society for Maternal-Fetal Medicine (SMFM) has identified five important ways that states are addressing the rising rates of maternal mortality: 1) the establishment of maternal mortality review committees, 2) the establishment of perinatal quality collaboratives, 3) the expansion of Medicaid, 4) reporting of maternal death data stratified by race/ethnicity, and 5) participation in the Alliance for Innovation on Maternal Health program. This fact sheet details the progress Michigan has made toward reducing maternal mortality. To view other state fact sheets, visit SMFM.org/scorecard.

Efforts by Michigan to Prevent Maternal Deaths

Pregnancy-Related Mortality Ratio
(number of pregnancy-related deaths per 100,000 live births)

Race	Michigan	USA
American Indian	-	28.3 [^]
Asian or Pacific Islander	-	13.8 [^]
Non-Hispanic Black	21.3 ^{**}	41.7 [^]
Hispanic	-	11.6 [^]
Non-Hispanic White	8.9 ^{**}	13.4 [^]
Overall	9.9 [*]	17.3 [*]

*2017 | **2013-2017 | ^2014-2017

Black women in Michigan are **more than twice as likely to die** from pregnancy-related causes than white women.

Insurance Coverage for Reproductive-Aged Women and New Mothers in Michigan

7%

of women 15-44 years of age are without health insurance.

Michigan's Medicaid program covers pregnant people up to

195%

of the federal poverty level.

Pregnant people and new mothers with monthly incomes of

\$3530

or less are eligible for Medicaid coverage (family of 3).

Many new mothers lose Medicaid coverage

60

days after giving birth.

Postpartum Medicaid Extension

SMFM recommends that states provide 12 months of comprehensive postpartum Medicaid coverage to all new mothers.

*Michigan's final FY 2020 - 2021 appropriations legislation included additional funding to provide continuous Medicaid coverage to new mothers for 12 months postpartum. The state submit an 1115 waiver to the federal Department of Health and Human Services and have the waiver approved for the coverage extension to take effect.

State Actions Aimed at Reducing Maternal Deaths

Maternal Mortality Review Committees

- Gather and analyze data and
- Make recommendations

Driving
Action
by

Perinatal Quality Collaboratives

- Build the infrastructure for and advance system-wide quality improvement efforts

AIM

- Implement patient safety bundles

Policymakers

- Advance policy reforms, including expanding and extending Medicaid coverage
