Maternal mortality rates in the United States are rising. The U.S. has the highest rate of maternal death among developed nations with significant racial disparities and large differences in rates between states. The Society for Maternal-Fetal Medicine (SMFM) has identified four important ways that states are addressing the rising rates of maternal mortality: 1.) the establishment of maternal mortality review committees; 2.) the establishment of perinatal quality collaboratives; 3.) the expansion of Medicaid; and 4.) reporting of data stratified by race/ethnicity. This fact sheet details the progress Ohio has made towards reducing maternal mortality. To view other state fact sheets, visit SMFM.org/USA.

State Activities Aimed at Reducing Maternal Deaths

- Maternal Mortality Review Committee
- Perinatal Quality Collaborative
- Medicaid Expansion
- Reports Maternal Mortality Data by Race

Medicaid Coverage for Pregnant Women

Ohio's Medicaid program will cover pregnant women if their family income is below 200% of the federal poverty line. In 2018, the FPL for a family of three is $20,780.
