

Hawaii

Maternal mortality rates in the United States are rising. The U.S. has the highest rate of maternal death among developed nations with significant racial disparities and large differences in rates between states. The Society for Maternal-Fetal Medicine (SMFM) has identified four important ways that states are addressing the rising rates of maternal mortality: 1.) the establishment of maternal mortality review committees; 2.) the establishment of perinatal quality collaboratives; 3.) the expansion of Medicaid; and 4.) reporting of data stratified by race/ethnicity. This fact sheet details the progress Hawaii has made towards reducing maternal mortality. To view other state fact sheets, visit SMFM.org/scorecard.

State Activities Aimed at Reducing Maternal Deaths

- 2018 2019
- ✓ ✓ Maternal Mortality Review Committee
- ● Perinatal Quality Collaborative
- ✓ ✓ Medicaid Expansion
- ✗ ✗ Reports Maternal Mortality Data by Race

Exists in the State ✓ In Progress ● Does Not Yet Exist ✗

Insurance Coverage for Reproductive-Aged Women

95% of women aged 19-64 years old have health insurance.

Hawaii's Medicaid program will cover pregnant women up to 196% of the federal poverty level.

Race	Hawaii	USA
White	--	26.1
Black	--	63.8
Pacific Islanders	--	17.0
Overall	22.9	29.6

While Hawaii does not report maternal mortality data by race, health disparities have been found to be a burden on Native Hawaiians and Pacific Islanders.
