

## Havana, terra

technical details

FOSCARINI

The young, light-weight appearance recalling the shape of a cigar, which ironically gives it its name, the soft light that it emits and the ease with which it blends in with the most varied contexts, have made it the great success that it is today, so much so that it is also part of the permanent collection on exhibit at the New York MoMA. The diffuser consists of four satin finish polyethylene segments. Small round metal hooks hold two subsequent elements together without them touching, leaving room for three slim empty bands that fill up with light when the lamp is on. Havana is available as a suspension, wall or floor lamp.
